## WUB Color Introduction :

WUB (Water Based Paste) is the new developed product designed for Eco-friendly PU leather and is specially aimed at prevention of solvent pollution, avoidance of hazards and environmental protection issues. WUB is made by non-hazardous substance and this product can widely used to water based resin. The compatibility of WUB with water based PU resin (including yellowing-resistant type and general type) is better in performance than any traditional water based paste. The main application for WUB is to replace solvent based processed pigment for PU leather and to color different kinds of substrates. WUB can be applied to anti-slippery mats , shoes , waterproof materials , wood coatings and so on.

### Product Characteristic:

1. WUB Color are Eco-Friendly water-based color pastes, made by non-restricted substances such as heavy metals 、 formaldehyde 、 phenol 、 PVC 、 plasticizer 、 organic tin 、 APEO 、 Azo Dyes . . . etc.
2. WUB Colors have excellent physical properties in light fastness , heat resistance , migration , color fastness , etc.
3. WUB colors have good compatibility and easy to mix with water based resin.

### Usage:

1. Dosage: Depending on the different concentrations and make sure it does not affect the physical properties for the substrate.
2. Viscosity: Using the compatible water-based resin to reduce the viscosity or using thicker to increase the viscosity.

### Attention:

1. To make sure consistency of hue and concentration, please stir evenly before use.
2. Do not expose to air and close the lid tightly after using.
3. Store in the cool place and prevent the sunlight.
